UNIVERSITY OF SCIENCE

Group Project Title

Author Name 1
Author Name 2
Author Name 3

Project Information

[This information should also be included in the README.md of the GitHub repository.]

Course:	MAT3508 – Introduction to Artificial Intelligence
Semester:	Semester 1, Academic Year 2025-2026
University:	VNU-HUS (Vietnam National University, Hanoi – University of Science)
Project Title:	[Your Project Title]
Submission Date:	[Submission Date] (e.g., 30/06/2025)
PDF Report:	Link to PDF report in GitHub repository
Presentation Slides:	Link to presentation slides in GitHub repository
GitHub Repository:	[GitHubRepositoryURL]

Name	Student ID	GitHub Username	Contribution
(Your Name 1)	(Student ID 1)	(GitHub Username 1)	(Contribution 1)
(Your Name 2)	(Student ID 2)	(GitHub Username 2)	(Contribution 2)
(Your Name 3)	(Student ID 3)	(GitHub Username 3)	(Contribution 3)

List of Figures

List of Tables

Contents

Chapter 1

Introduction

1.1 Summary

[Brief summary of the project, main objectives, and key results. Write 1-2 paragraphs summarizing the group's work.]

1.2 Problem Statement

[Describe the problem addressed and its practical significance. Explain why it is important and the existing challenges.]

Chapter 2

Methods & Implementation

2.1 Methods

[Summarize the approach, theoretical foundation, algorithms, and data used. You may add diagrams or pseudocode if needed.]

2.2 Implementation

[Describe the system, tools, and code structure. List libraries, frameworks, or technologies used.]

Chapter 3

Results & Analysis

3.1 Results & Discussion

[Present main results, evaluation metrics, and analysis. Use tables, figures, or charts if needed.]

Chapter 4

Conclusion

4.1 Conclusion & Future Work

[Summarize contributions and propose improvements or future directions.]
